Q - SERIES PLC HMI
VFD FX - SERIES PLC

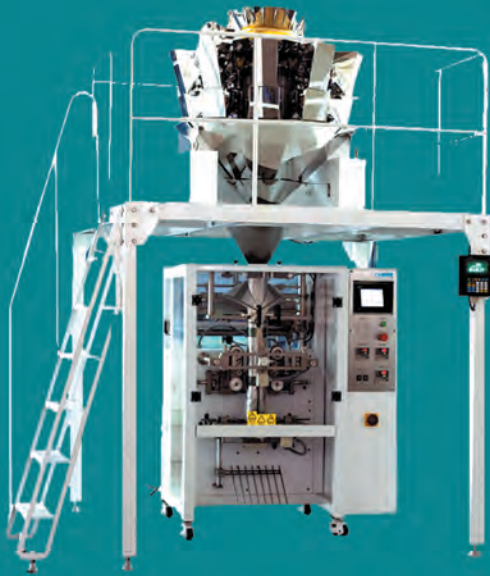

SERVO MOTOR
& AMPLIFIER

With a commitment ever since its inception in 1993, Omega industries has developed unique technical capabilities to offer total solution in the field of Electrical and Automation serving different verticals of industries, both process and discrete alike.

Being System integrators for Mitsubishi Electric India, we offer unique factory automation solutions to OEM's, end users such as packaging automotive, food and beverage, textile, coil winding etc.

Our product range and expertise in customization includes but not limited to Servo Motors, Servo Amplifiers, encoders, PLC, HMI, VFD, Industrial PC. Our full - fledged facilities to manufacture electrical and automation panels in our Peenya Industrial Estate, Bangalore is a testimony to our commitment to serve the industry.

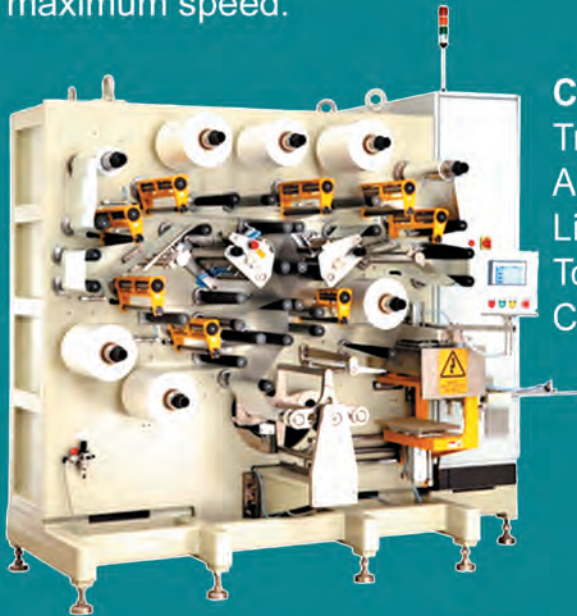

PACKING MACHINES

When the machine packs materials, each process is synchronized by using synchronous control and cam control. The packing film is cut using the register mark as a reference mark detection function.

Vertical form filling machine
Pouch form sealing machine
Horizontal form filling machine

CONVEYOR MACHINES

Vibration is minimized and a short tact time is achieved with the advanced S-curve acceleration / deceleration function, which sets the interval of smooth acceleration and the interval of acceleration at the maximum speed.

COIL WINDING MACHINES

Transformer coil winding
Armature coil winding
Linear coil winding
Toroidal coil winding
Capacitor coil winding

SPECIAL PURPOSE MACHINES

Grinding machine
Tooling machine
Deep hole drilling machine
Leak Test Machine
Carton Box making machine
Laminating machine
Thermoforming machine
